

Ultrasound Technology Education Program

Did You Know: medical sonographers (ultrasound technicians) command an average salary of \$65,000!

Ultrasound technology is a growing field, and technicians are needed to fill important posts at hospitals, clinics and private practices.

To highlight and promote the rewarding field of obstetric ultrasound technology, Stanton Healthcare of Southern California is proud to offer a unique educational opportunity for high school and college students: an interactive presentation featuring live ultrasounds performed on a state-of-the-art portable ultrasound machine, coupled with current information about entry into the ultrasound technology field.

Stanton Healthcare is a non-profit corporation and presents this program free of charge to schools and community groups. For more information, contact us today!

Protect Them Both Advocacy & Education

Thanks to the recent exposure of Planned Parenthood's unethical activities and the subject of abortion frequently in the headlines, many pro-life churches and communities are asking, "what can we do to combat this culture of death?"

In response, Stanton Healthcare of Southern California is proud to offer a unique educational opportunity for groups of all ages: **an interactive, eye-opening presentation featuring a live prenatal ultrasound performed on a state-of-the-art portable ultrasound machine.**

Utilizing winsome arguments and proven scientific facts, Stanton's engaging presenters will demonstrate why and how individual people can advocate for both mother and child in a society which devalues life.

For more information about bringing this presentation to your church, youth group or school, contact us today!
